

## Sources for Zipper Organizers to Create Portable Water Test Kits:

<http://www.maxpedition.com/store/pc/Organizers-c26.htm>  
<http://www.thegrommet.com/ready2go-small>

## Sources for ORP Meters

*Recommended:* American Marine Pinpoint <http://americanmarineusa.com/>

Other Meters: <http://www.rakuten.com/sr/searchresults.aspx?qu=ORP+meters>

## Local Water Report

<http://water.epa.gov/drink/local/>  
<http://www.ewg.org/tap-water/>

## Water Jugs

- Check with your local dairy for 1 gallon plastic jugs - typically less than \$1 each.
- Check your local brewery supply store for brown glass jugs.
- Any grocery or store that sells RO water also sells BPA-free containers.
- Order as a team and save money: Glass and plastic jugs available at <http://www.uline.com> or <http://www.usplastic.com> for bulk orders.

### DVD with Water Class

### Reagent Drops

- Both OTO [chlorine] and pH drops are available from AlkaViva.
- OTO drops are also available at pool supply stores. We do not recommend buying pH drops from other sources because of variations in color results.
- DO NOT USE pH paper to test alkaline water.

## Water Class Folder: Resource Center

- ORP Chart
- pH Chart [also included in your welcome kit]
- Flyers, invitations
- Product information sheets
- Filter test results
- Water Class PowerPoint
