

the Perfect Pitcher
with ULTRAWATER[®] inside

Take Back Your Tap!

ALKAVIVA

Water This Good Has Never Been Available At This Price!

The Cleanest and Healthiest Pitcher
Fills twice as fast. Lasts two times longer. Incomparably cleaner. Health-enhancing. Affordable.

Cleaner Filtration

How does UltraWater filtration compare with leading pitchers that use basic old-style carbon filters? There is no comparison.

UltraWater changes oxidizing, chemical-laden tap water into the cleanest, healthiest water. We have independent, EPA certified laboratory testing to prove it. Our testing confirms that up to 99.9% of pharmaceuticals, heavy metals, pesticides, chlorine, chloramines, fluoride, and other chemicals are removed from your tap water. Now you and your family can have the cleanest, healthiest and best tasting water free from dangerous chemicals. All in an affordable pitcher.

The Perfect Pitcher provides the highest level of contaminant removal of any pitcher available today. Powered by UltraWater™, this proprietary, patent-pending filtration system is capable of reducing contaminants in tap water up to 99.9% including:

- Pharmaceuticals
- Chromium 6
- Arsenic
- Aluminum
- Fluoride
- VOCs
- THMs
- Detergents
- Lead
- Mercury
- Pathogens
- Agricultural Chemicals
- Chlorine
- Chloramines
- Pesticides
- Industrial Waste

Faster and More Efficient Filtration

Filters your water 2 times faster and 2 times longer!

You get UltraWater protection AND you get it twice as fast as other leading pitcher brands! Other pitchers take over seven minutes to filter a liter of water. The UltraWater pH_D Pitcher delivers substantially more contaminant reduction, producing a liter of the cleanest, healthiest water in just over three minutes. The UltraWater filter also lasts twice as long as other pitcher and gravity filters.

Contaminant-free.
 Energized.
 Antioxidant.
 Delicious.
